General

This document contains material based on publicly-available information. Although every reasonable care has been taken to ensure the accuracy and objectivity of the information contained in this document, United Overseas Bank Limited ("**UOB**") makes no representation or warranty as to, neither has it independently verified, the accuracy or completeness of such information (including any valuations mentioned). UOB neither represents nor warrants that this document is sufficient, complete or appropriate for any particular purpose. Any opinions or predictions reflect the writer's views as at the date of this document and may be subject to change without notice.

The information contained in this document, including any data, projections and underlying assumptions, are based on certain assumptions, management forecasts and analysis of known information and reflects prevailing conditions as of the date of publication, all of which are subject to change at any time without notice. Past performance figures are not indicative of future results.

Not an offer or solicitation to any particular person

This document should not be regarded as an offer or solicitation to any particular person to transact in any product mentioned. Before deciding to invest in any product mentioned, please seek advice from your financial, legal, tax or other appropriate advisers on the suitability of the product for you, taking into account your specific investment objectives, financial situation or particular needs (to which this document has no regard). If you do not wish to seek such advice, please consider carefully whether any product mentioned is suitable for you.

Risks

An investment in any product mentioned in this document may carry different risks of varying degrees, including credit, market, liquidity, legal, cross-jurisdictional, foreign exchange and other risks (including the risks of electronic trading and trading in leveraged products). Nothing in this publication constitutes personalized accounting, legal, regulatory, tax, financial or other advice that regards the personal circumstances of a particular recipient. Please speak to your financial, legal or other appropriate adviser to understand the risks involved and whether it is appropriate for you to assume such risks before investing in any product.

Any description of investment products is qualified in its entirety by the terms and conditions of the investment product and if applicable, the prospectus or constituting document of the investment product.

Valuation

Product valuations in this document are only indicative and do not represent the terms on which new products may be entered into, or existing products may be liquidated or unwound, which could be less favourable than the valuations indicated herein. These valuations may vary significantly from those available from other sources as different parties may use different assumptions, risks and methods.

No liability

To the fullest extent permitted under applicable laws and regulations, UOB and its affiliates shall not be liable for any loss or damage howsoever arising as a result of any person acting or refraining from acting in reliance on any information, opinion, prediction or valuation contained herein.

UOB and its affiliates involved in the issuance of this document may have an interest in the products mentioned in this document including but not limited to, marketing, dealing, holding, acting as market-makers, performing financial or advisory services, acting as a manager or co-manager of a public offering, of persons mentioned in this document. UOB and its affiliates may also have alliances, contractual agreements, or broking, investment banking or any other relationships for the provision of financial services, with any product provider mentioned in this document. UOB and its affiliates may have issued other reports, publications or documents expressing views which are different from those stated in this document and all views expressed in all reports, publications and documents are subject to change without notice.

Others

Unless you are notified otherwise by UOB, UOB deals as a principal in any transaction which UOB has been instructed to effect, other than transactions relating to securities traded on an exchange, unit trusts and funds on your behalf where UOB acts as your agent.

Singapore. This document and its contents are intended for Accredited Investors (as defined in Section 4A of the Singapore Securities and Futures Act (Chapter 289)).

HUOB

But, the economy was growing well.

Global economy was growing well.

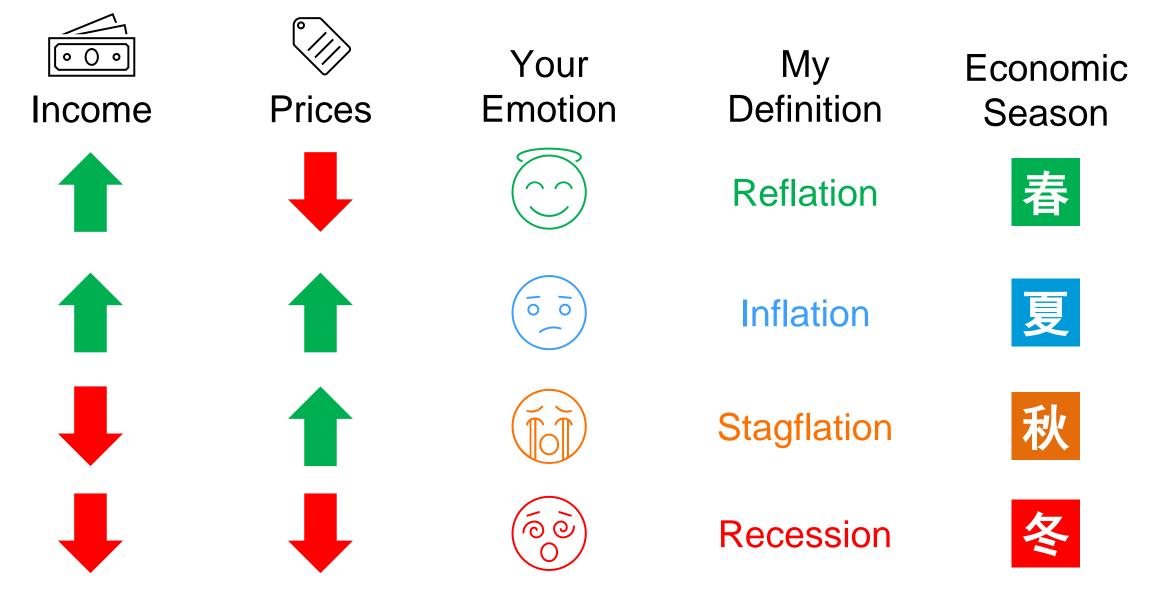

But stock markets were mostly down.

What happened? Did the business cycle break down?

Wait... What exactly is the business cycle?

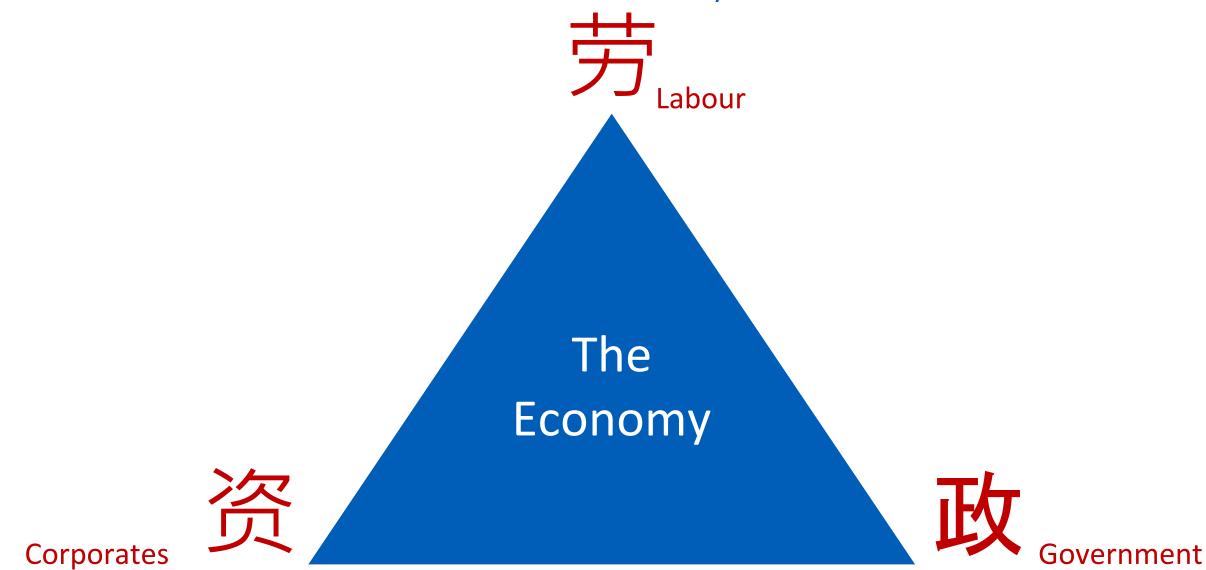

Let me do a little survey here...

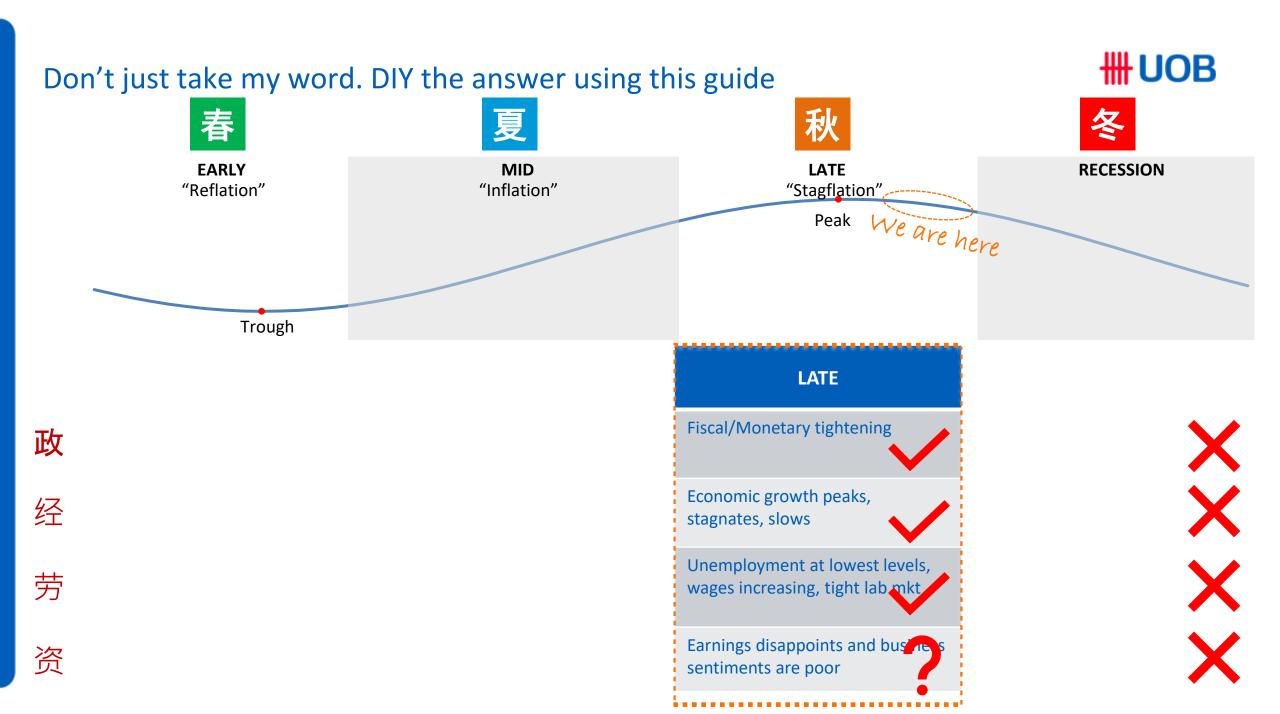

The constant interaction of stakeholders of an economy...

World Bank's latest outlook: A summary & talking points

2023 Global GDP Growth Jun 22 projection = 3% Jan 23 projection = 1.7% Mar 23 projection = 2%

"Global growth has slowed to the extent that the global economy is perilously close to falling into recession."

Ayhan Kose Chief economist and director of the World Bank Group's Prospects Group "The risks that we warned of six months ago have materialized and <mark>our worst-case scenario is now our baseline scenario</mark>. The world's economy is on a razor's edge and could easily fall into recession <mark>if financial conditions tighten</mark>."

Monetary Authority of Singapore (14 Apr 2023)

"Singapore's GDP growth is projected to moderate "Singapore's GDP growth is projected to moderate significantly this year, in line with the global goods and investment cycle downturn." With intensifying risks to global growth, the domestic economic slowdown could be deeper "The drag on global investment and manufacturing from tighter financial conditions will intensify in the quarters ahead." Singapore's GDP growth is projected to be below trend

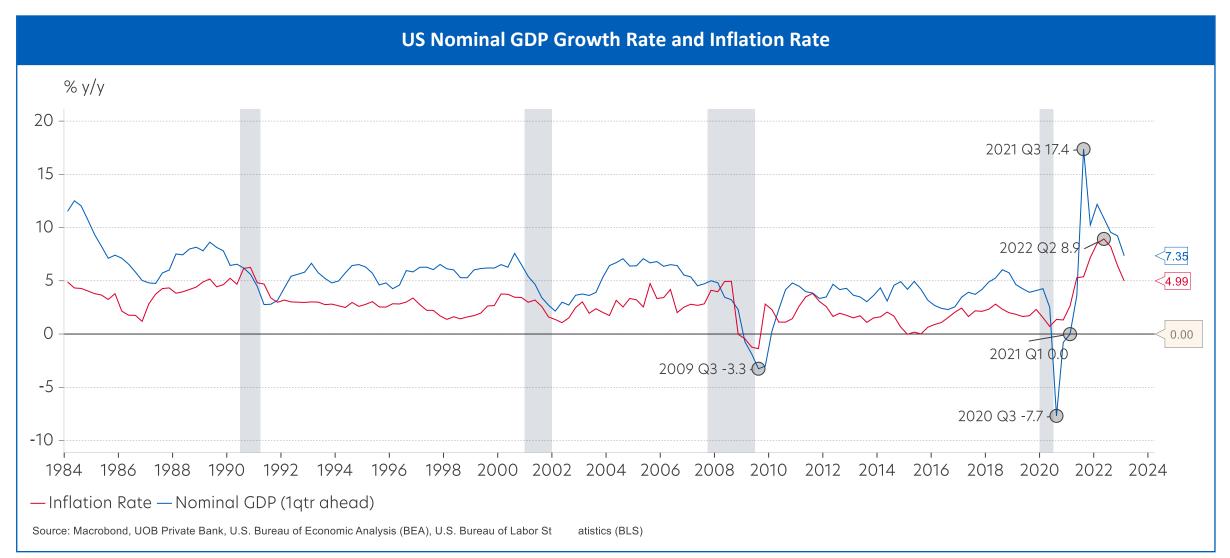

than anticipated.

"Prospects for Singapore's GDP growth this year have therefore **dimmed**."

HUOB

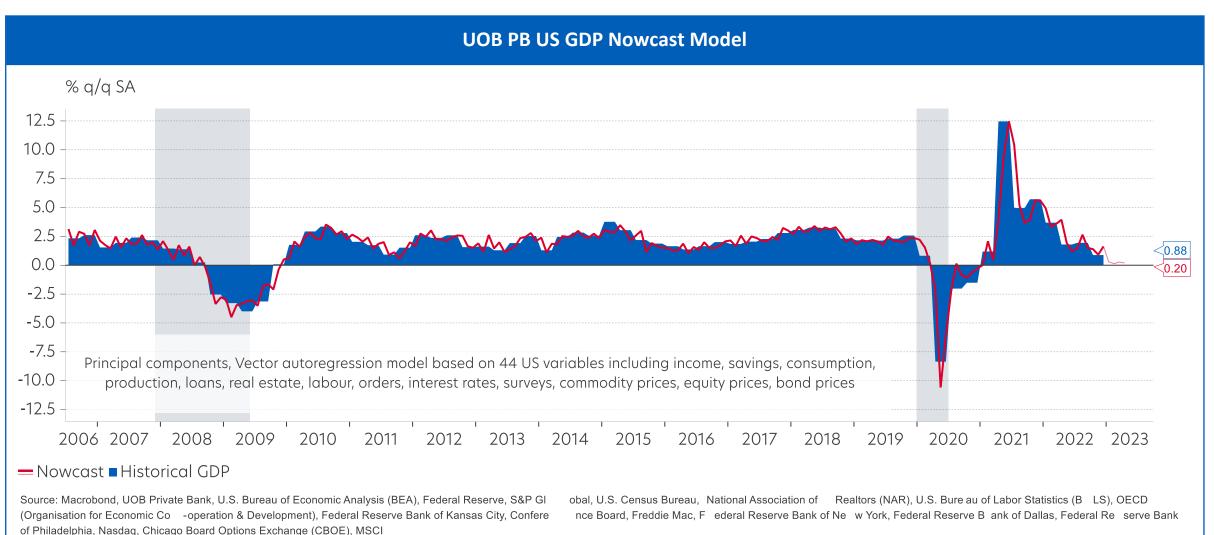

经: US economy is cooling...

经: US economy is cooling... quickly!

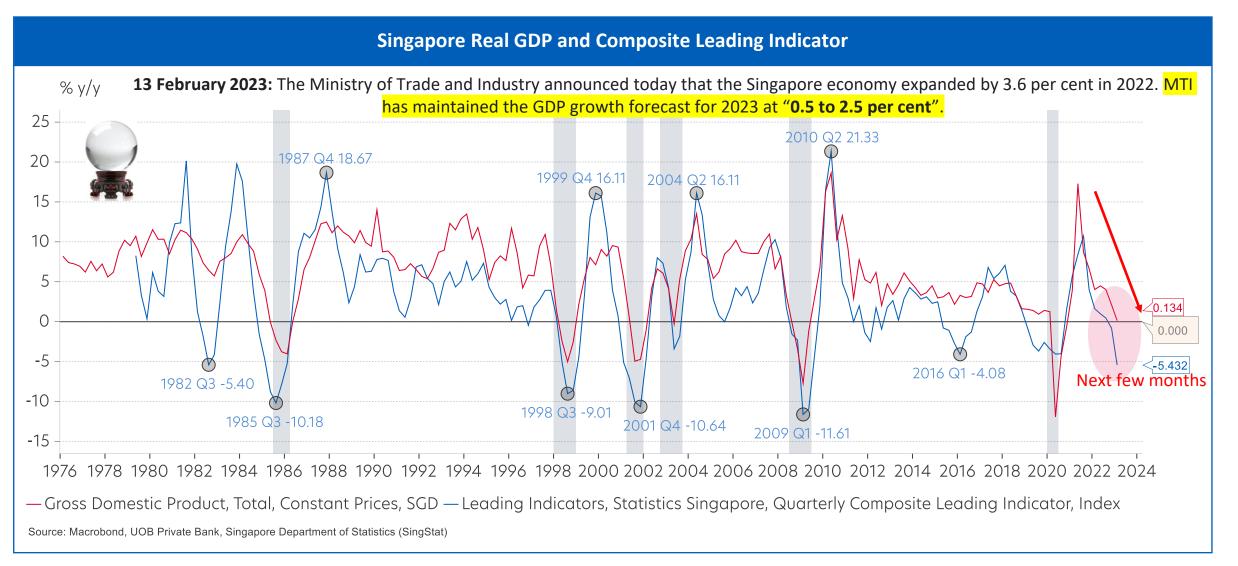

14

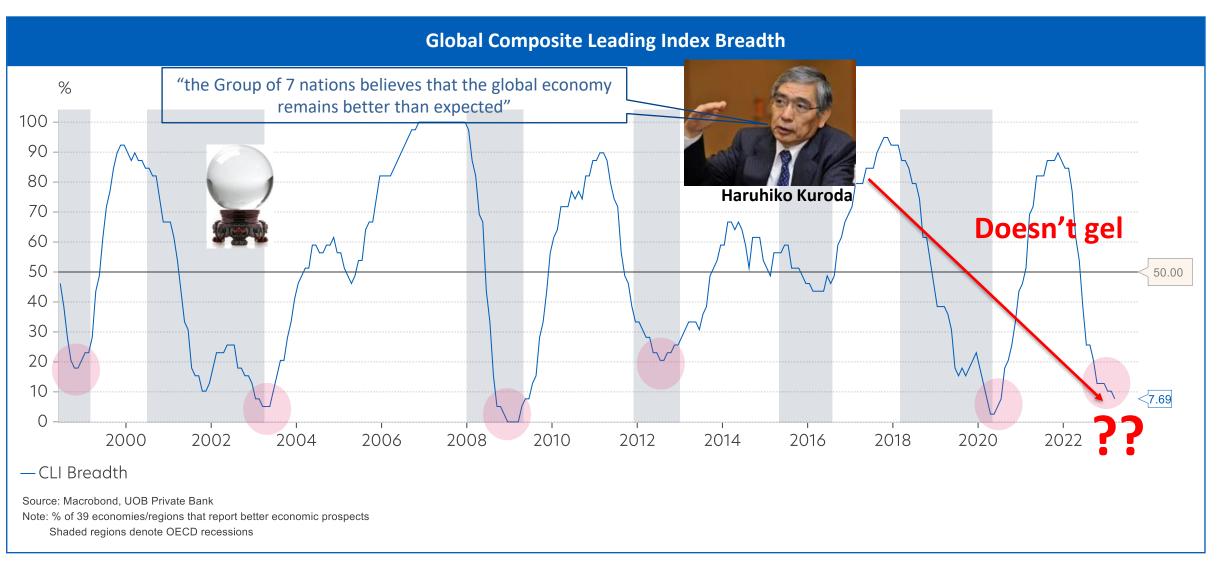

经: Singapore economy is cooling fast too

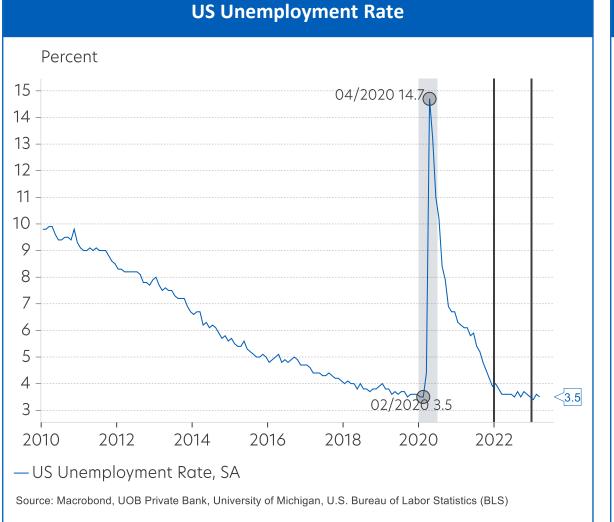

经: Only 8% of global economies expecting "better 6M ahead"

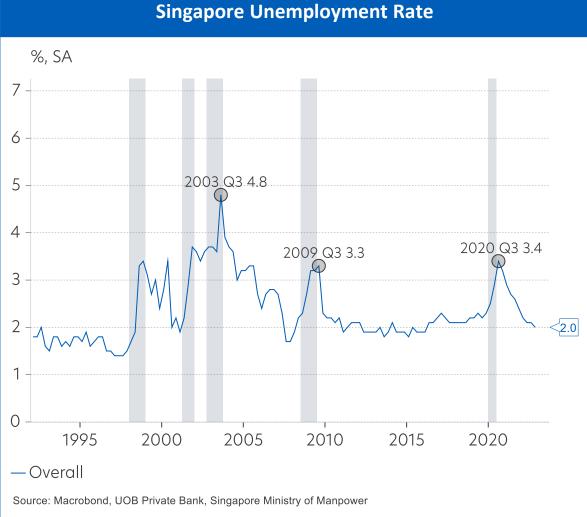

劳: Unemployment rates are low

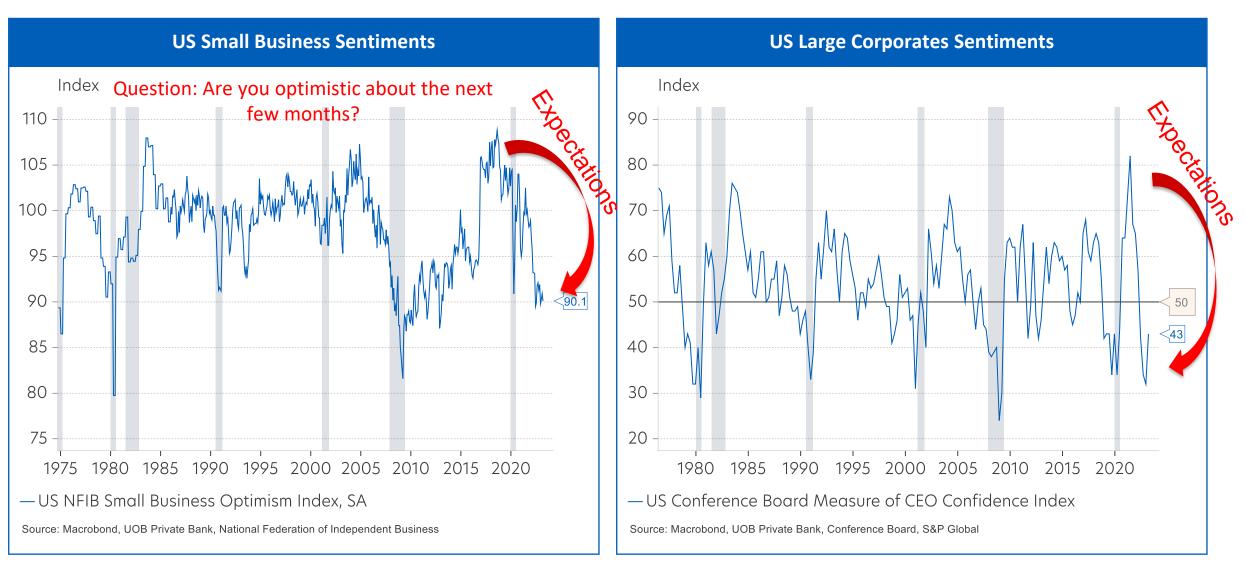

17

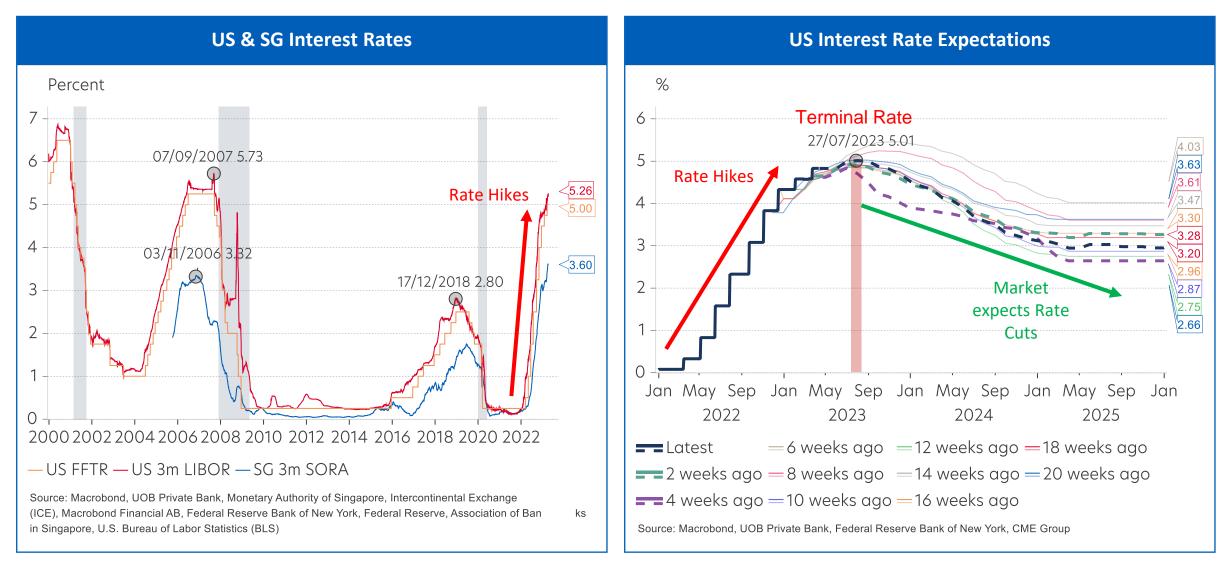

资: Business owners are getting really pessimistic

政: Monetary policy remains tight, but rates peaking

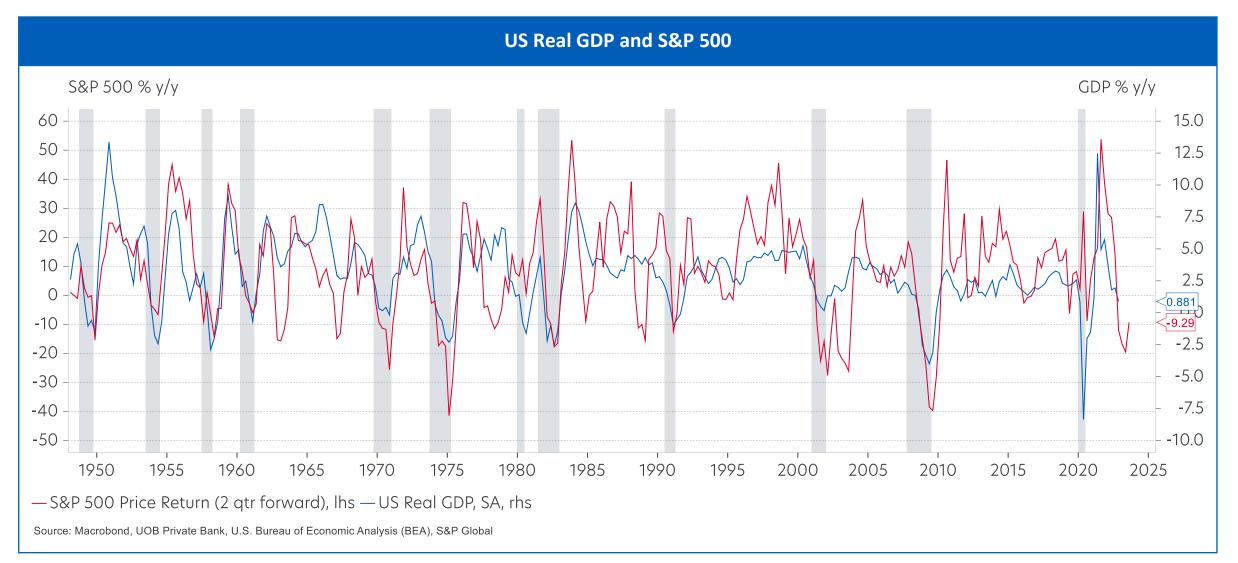

The business cycle did not break down. Indicators predict accurately where we are.

We are in Autumn and Winter is Coming.

Why then did Equities underperform when economic growth was alright and we didn't have a recession last year?

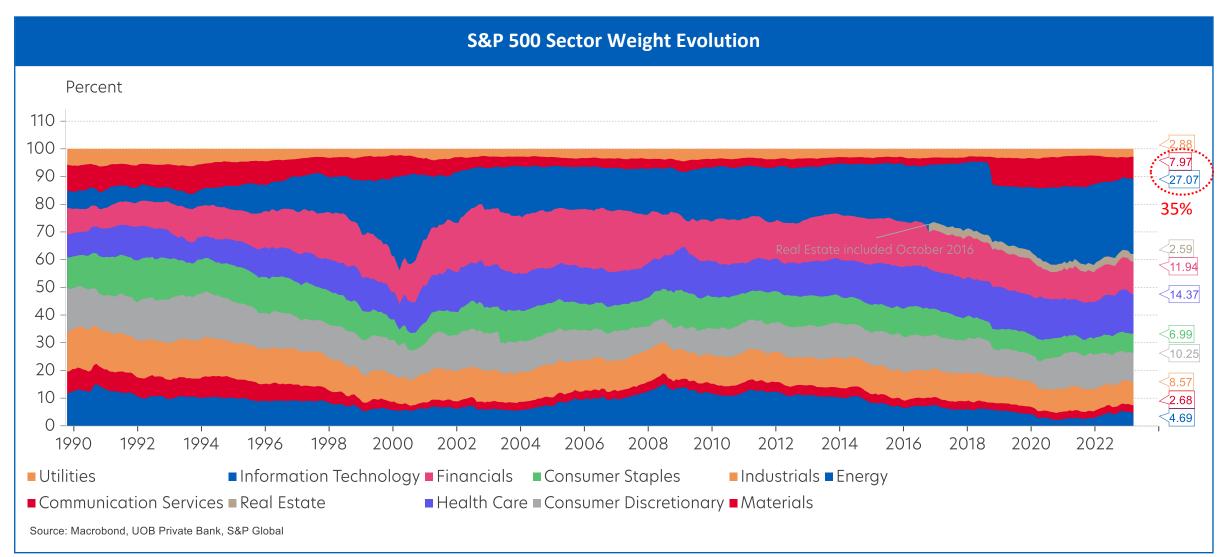

Equities are quick tempered – Anticipatory & Jittery

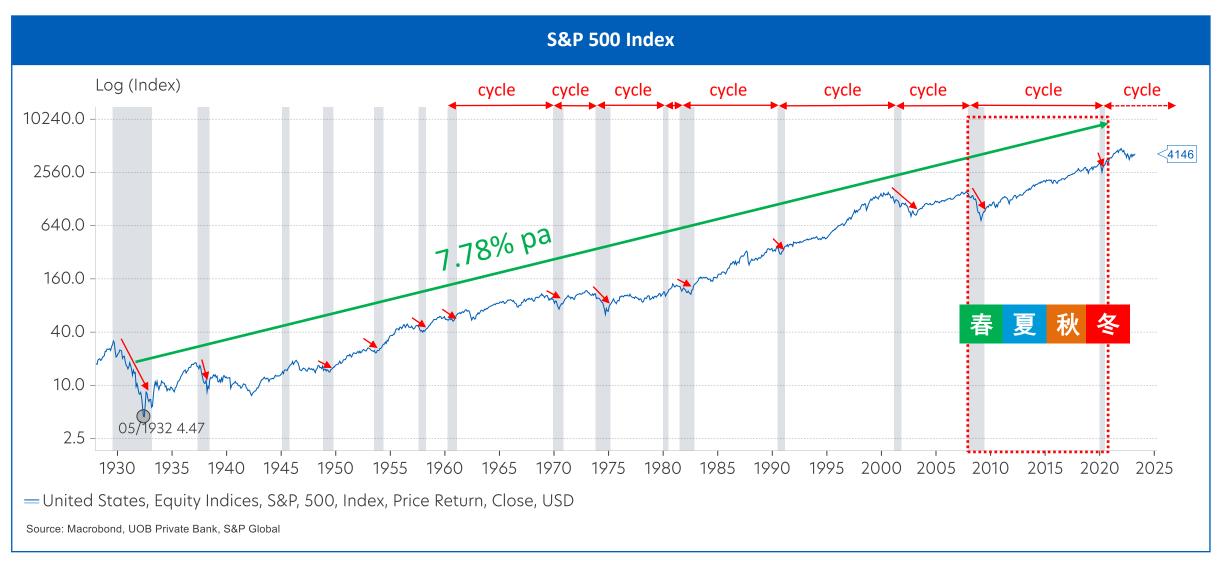

Larger % of "Growth sectors" in S&P 500 ("interest-rate sensitive")

Staying invested is important. Knowing business cycle equally so.

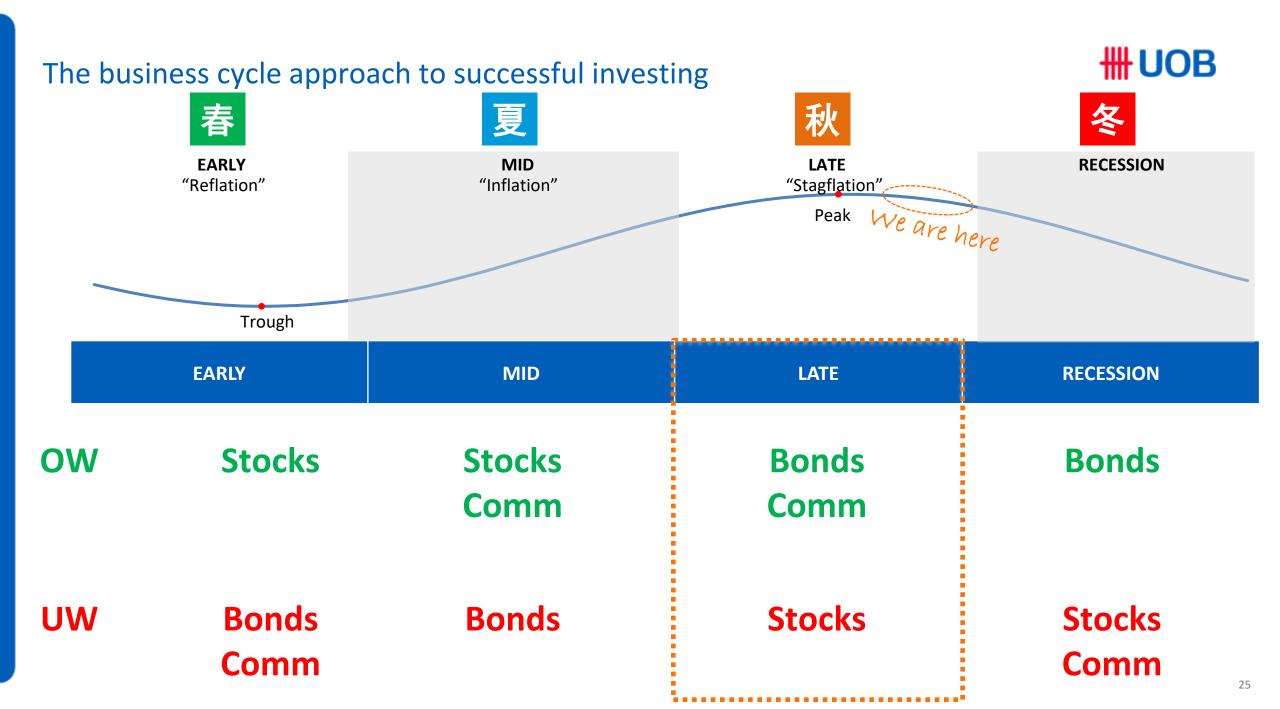

Summary

- Asset markets are **highly anticipatory** of real economic activities.
- The constant interaction of stakeholders in an economy forms the business cycle. But the constant
 expectation of the interaction of stakeholders in an economy forms asset markets (equities, fixed
 income, etc) movements.
- Asset markets are also highly jittery. Other than economic fundamentals, one need to look at Valuations, Technicals, Fund Flows, Sentiments, Alternative data, etc.
- Sell-offs in Equities do not always lead to an economic recession; but before every recession, Equities do get sold-off.
- The increasing share of "Growth" stocks (eg: Technology, Comms Svcs) in stock indices (eg: S&P 500) will provide "false signals" on economic activities as they are more "interest-rate sensitive" than "economically sensitive".

Question & Answer

Francis Tan Investment Strategist, First Vice President Investment Products and Solutions United Overseas Bank (UOB) Private Bank

Francis is an Investment Strategist with UOB Private Bank. Before this, he was an economist with UOB's Global Economics and Markets Research team, where he was responsible for ASEAN economics. Francis also provides regular economic commentaries in English and Mandarin through local and international print and broadcast media.

Before joining UOB, Francis held roles in Asian and global financial institutions as an investment strategist and an investment manager. His career also included stints as an economist at the Singapore Ministry of Trade and Industry and the Singapore Tourism Board, where he specialised in Tourism Economics.

Francis holds a Bachelor of Social Science (Honours) in Economics and a Master of Social Science in Applied Economics from the National University of Singapore. Continuing his academic interests in the field of applied economics, Francis also contributed a chapter titled "Tourism Demand in Singapore: Estimating Neighbourhood Effects" in the Handbook of Tourism Economics (2013) and published a paper titled "Growth and Environmental Quality in Singapore: Is There Any Trade-off?" in the Ecological Indicators journal (2014).
